

Kyoto Panel Concave

sku: 7.20149

This painstaking carving process is aimed to show a different side of the natural beauty and texture of wood that is not usually seen on plain surfaces. The peaks and valleys created convey an abstract texture that is organic and sculptural in form. Painted in black, the texture mimics that of delicate charcoal with none of its instability. Constructed of Gmelina wood, a cousin to Beechwood. Matte black finish.

Vacuum with brush tip only along the direction of cuts. Avoid wiping with a cloth as delicate edges may chip. To retouch chips which may occur, use a black matte marker on the exposed wood.
