

AluPro Aluminum Nonstick Fry Pan

sku: 13620

Demeyere infuses its cookware expertise into this ultimate nonstick collection. AluPro's innovative 5-layer Ti-X coating features three layers of enhanced nonstick coating, a Plasma Primer for superior resistance to metal utensils, and a protective layer that prevents peeling, blistering, corrosion and abrasions. Quick releasing and easy to clean, this high-performance, PFOA-free coating will last for a long time. Made from extremely pure aluminum, the 5mm thick cold forged body heats up rapidly and evenly for perfect frying and even browning. Lightweight aluminum eliminates arm strain along with the ergonomic stay-cool handles that are comfortable to grip. Along with flared rims that prevent pouring spills, these user-friendly details make these nonstick pans ideal for everyday use. AluPro works all cooking surfaces - gas, electric, glass, and induction. TriplInduc technology by Demeyere makes this aluminum pan induction compatible and 30% more efficient than competitors. The durable Ti-X nonstick coating makes this pan oven and broiler safe up to 500F.

Demeyere AluPro Aluminum Nonstick Fry Pan
