- Upholstery: To prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is recommended. Spot clean using a mild water-free solvent or dry-cleaning product containing carbon tetrachloride. Pretest a small area before proceeding. Cleaning by a professional cleaning service only is recommended.

- Acrylic: Sweep off any dust or debris that can be dislodged easily. This prevents the dust from acting as an abrasive material when you begin to wash the acrylic. Use a soft cleaning cloth or sponge and warm soapy water to wipe the furniture surface clean. Rinse with clean water and allow acrylic to air-dry in a warm, well-ventilated area. Do not use any cleaning agents containing ammonia (including Windex) on acrylic. Be sure to use a clean cloth or sponge. Do not clean with anything that may have been previously used with solvents or chemicals as they may transfer to the acrylic during cleaning.
