

Utopia 1 Light Wall Sconce - Black Brass Acacia Wood Shades

sku: 280-11

Inspired by the sculptural light fixtures made popular in Italy during the '50s by the likes of Gio Ponti, these fixtures have a twist of their own with the unexpected use of acacia wood shades. The depth and texture allows these fixtures to become a design classic in their own right. The white-and-metal version with polished brass accents is a bold monochromatic statement that proves the eternal decorative power of black-and-white on the home.
